SSP Vendor Solutions

An overview of our innovative offerings.
Updated: August 2020.

SSP Overview

At **SSP**, we leverage our industry-leading security, data center, cloud, and managed services offerings to enable your business and boost your growth.

With over 35 years of experience under our belt, SSP is more than prepared to tailor solutions to your business environment. By combining our deep experience with industry-leading security, data center, cloud, and managed services offerings, we have the expertise and reach to make any project happen — whether it be providing simple plug-ins or architecting the biggest operations.

Our innovative solutions encompass the following:

	Endpoint Detection and Response		Email Protection
	Cloud Security		Network Packet Capture
	Data Center Storage		Privilege Access Management
	Incident Response		SIEM
	Network Infrastructure		Vulnerability Assessment
	Key Generation & Management		NG Firewall Platform
	Endpoint Protection		Encryption
	Data Center Networking		**Data Center Compute**

For more detailed information about our partners and offerings, please contact your sales representative or sales@ssp.com.

Partner Overview

The demand for anytime, anywhere, any device network access has become workplace mandate but has also introduced new, complex IT challenges. Cisco's enterprise networking product line meets these challenges. Cisco's end-to-end solutions provide the resilience, scalability and security needed to support the requirements of mission critical applications, the impact of voice and video, and the proliferation of mobile devices. And as Cisco Premier Partners, we can deliver the next-level all-encompassing, and scalable solutions to enable your growth.

Cisco Meraki, the industry leader in cloud-managed IT, creates the most efficient, flexible, straightforward, and effective solutions to support and optimize your specific environment. Meraki technology, managed from an intuitive, feature-rich interface, enables organizations to rapidly roll out digital initiatives, delivering real business value. Whether you need wireless, switching, security, SD-WAN, intelligent network insights, endpoint management, or security cameras, Cisco Meraki has you covered.

Barracuda simplifies IT with cloud-enabled solutions that empower customers to protect their networks, applications, and data, regardless of where they reside. These powerful, easy-to-use, and affordable solutions are delivered in appliance, virtual appliance, cloud, and hybrid deployment configurations. Barracuda's customer-centric business model focuses on delivering high-value, subscription-based IT solutions that provide end-to-end network and data protection

The SSP and FireEye partnership offers SSP customers one of the world's most highly regarded cyber security portfolios. Together, SSP and FireEye blend world-renown human expertise and nation-state grade threat intelligence into security innovations dedicated to defending networks, email, and devices. With SSP, FireEye, and Mandiant's world-renowned consulting, the most comprehensive threat visibility, prioritized response guidance and simplified operations will drive your security success.

Westcon-Comstor is a value-added technology distributor of category-leading solutions in security, collaboration, networking, and Data Center. We will provide you with access to their technology supply chain and transformative capabilities in cloud, services, and global deployment.

For more detailed information about our partners and offerings, please contact your sales representative or sales@ssp.com.

aws

Amazon Web Services (AWS) delivers services for broad range of applications including compute, storage, databases, networking, analytics, machine learning and artificial intelligence (AI), Internet of Things (IoT), security, and application development, deployment, and management. Their comprehensive, highly reliable, secure, scalable, low-cost cloud infrastructure platform will increase your agility and optimize your datacenters.

paloalto NETWORKS

Palo Alto Networks is known for challenging the security status quo and has privilege of safely enabling tens of thousands of organizations and their customers. By delivering customers a single platform and empowering a growing ecosystem of change-makers like Palo Alto Networks and SSP, we can provide highly effective and innovative cybersecurity across the cloud, networks, and mobile devices.

CROWDSTRIKE

CrowdStrike is a global cybersecurity leader currently redefining security for the cloud era with an endpoint protection platform built from the ground up to stop breaches. The CrowdStrike Falcon® platform's single lightweight-agent architecture leverages cloud-scale (AI) and offers real-time protection and increased visibility across the enterprise, preventing attacks on endpoints on or off the network. Powered by the proprietary CrowdStrike Threat Graph, CrowdStrike Falcon is one of the world's most advanced data platforms for security.

<) FORESCOUT

Forescout's dedication to visibility and control in network security, along with SSP's mission to tailor a perfect-fit solution for your company, allows us to tackle your problems with the ultimate flexibility. Forescout has pioneered an agentless approach to network security and their technology continuously assesses, remediates, and monitors devices and works with disparate security tools to help accelerate incident response, break down silos, automate workflows, and optimize existing investments.

INGRAM MICRO®

Ingram Micro helps businesses realize the promise of technology. It delivers a full spectrum of global technology and supply chain services to businesses around the world. Deep expertise in technology solutions, mobility, cloud, and supply chain solutions enables its business partners to operate efficiently and successfully in the markets they serve. Unrivaled agility, deep market insights and the trust and dependability that come from decades of proven relationships, set Ingram Micro apart and ahead.

For more detailed information about our partners and offerings, please contact your sales representative or sales@ssp.com.

Cloud Harmonics, and Ingram Micro company, provides the capabilities that you need to accelerate the adoption, ramp and sales of next-gen cybersecurity, software-defined data center and cloud technologies. Cloud Harmonics is the only distributor offering a purpose-built educational curriculum and platform (Orchestra), hands-on virtual sandbox testing environments, and pre- and post-sale tools and services to arm partners with the skills and confidence to add and profit from next-gen technologies in their portfolio.

Microsoft is a global technology giant focusing on the development and implementation of software used on computers and on the Internet. We have expertise across the Microsoft portfolio, and our partnership allows us to tap into early access to new products, early adopter programs, and technical support, which will directly benefit you.

HPE is a global technology leader focused on developing intelligent solutions that allow customers to capture, analyze and act upon data seamlessly from edge to cloud. HPE enables customers to accelerate business outcomes by driving new business models, creating new customer and employee experiences, and increasing operational efficiency today and into the future.

As partners, IBM and SSP work together to provide comprehensive data center solutions that exceed customer expectations. IBM has an extensive history of innovation as well as a visionary product development strategy that continually redefines and expands the concept of cutting edge. We have expertise across the IBM product line and deliver new efficiencies to businesses while maximizing return on investment.

Infoblox is pioneering digital transformation in core network services, including next-level DNS, DHCP, and IP address management (DDI)and DNS Security . Infoblox delivers Secure Cloud-Managed Network Services, bringing next-level security, reliability and automation to cloud and hybrid systems, managed through a single pane of glass. Next Level Networking takes you to a world where network and security services are managed and consumed from the cloud while preserving your investments in on-prem systems maximizing the advantages the cloud can bring to your network today.

For more detailed information about our partners and offerings, please contact your sales representative or sales@ssp.com.

Lenovo delivers world's most complete portfolio of smart devices and infrastructure, including the industry leading ThinkSystem servers and rich functionality of DataCore software. Together, SSP and Lenovo will provide you with the most efficient and effective infrastructure to optimize your environment and business investment.

VMware transforms your datacenter by delivering a broad range of software-defined networking and security solutions to increase visibility within your environment. vCloud Networking and Security enhances operational efficiency, unlocks agility and is extensible to rapidly respond to business needs. As a partner, SSP will ensure that VMware will providing a comprehensive networking framework solution and to integrate third-party solutions to improve and optimize your network.

Veeam is the global leader in Intelligent Data Management. Veeam Availability Platform is the most complete solution to help customers on the journey to automating data management and ensuring the availability of data. As partners, SSP and Veeam will update your environment from policy-based to behavior-based management to make data both intelligent, and ultimately, self-governing to enable your intelligent data management journey.

Cisco's **Duo** Security is the leading multi-factor authentication (MFA) and Zero Trust for the Workforce provider. The company's zero-trust security platform, Duo Beyond, enables organizations to provide trusted access to all critical applications - for any user, from anywhere, and with any device.

Juniper Networks challenges the status quo with products, solutions and services that transform the economics of networking. Our team co-innovates with customers and partners to deliver automated, scalable, and secure networks with agility, performance, and value.

Nimble Storage delivers transformative storage architecture, designed to be dynamic and flexible while ensuring your performance, capacity, and security is at always as its best. Their array of intelligent, scalable, self-managing flash storage for data center and cloud leverages data analytics to guarantee the best all-flash capacity in the industry. Together, SSP and Nimble will help you realize the full potential of your environment.

For more detailed information about our partners and offerings, please contact your sales representative or sales@ssp.com.

CYBEREADY

CybeReady is the only autonomous cybersecurity training platform for enterprises. The CybeReady solution utilizes data science-powered training that implements next-level, adaptive learning methodology and guarantees changes in employee behavior towards phishing attacks. Together with SSP, CybeReady will ensure that your enterprise's line of defense year-round.

Gigamon®

Gigamon empowers customers with the ability to capture all traffic traversing physical and virtual networks, maximizing cybersecurity forensic capabilities. Their technologies such as Gigamon's Visibility Fabric and GigaSECURE, deliver advanced intelligence so that security, network and application performance management solutions in enterprise, government and service provider networks operate more efficiently and effectively.

DARKTRACE

Darktrace is the world's leading cyber AI company and the creator of Autonomous Response technology. Its self-learning AI is modelled on the human immune system and used by over 3,000 organizations to protect against threats to the cloud, email, IoT, networks and industrial systems. This includes insider threat, industrial espionage, IoT compromises, zero-day malware, data loss, supply chain risk and long-term infrastructure vulnerabilities.

okta

Okta is the leading independent provider of identity for the enterprise. The Okta Identity Cloud enables organizations to securely connect the right people to the right technologies at the right time. With over 6,000 pre-built integrations to applications and infrastructure providers, Okta ensures you can easily and securely use the best technologies for your business.

UNITRENDS
A Kaseya COMPANY

Unitrends, a Kaseya company, makes efficient, reliable backup and recovery simple and effortless. By combining deep expertise gained from more than 30 years of innovation on backup and recovery with today's next generation backup appliances and cloud-based options, Unitrends provides automated and resilient data protection.

Pulse Secure®

Pulse Secure offers easy, comprehensive Secure Access solutions that provide visibility and seamless, protected connectivity between users, devices, things, and services. The company delivers suites that uniquely integrate cloud, mobile, application and network access to enable hybrid IT, and will empower you with secure access to applications and information in the data center and cloud while ensuring business compliance.

For more detailed information about our partners and offerings, please contact your sales representative or sales@ssp.com.

Secureworks is a technology-driven cybersecurity leader that provides protection designed to combat today's ever-evolving threat landscape. Built on world-class threat intelligence, their applications, and solutions such as their Red Cloak software and Counter Threat Platform brings advanced threat analytics to provide even the most complex environments with deep visibility and security. Together with Secureworks, SSP ensures that your security is simple, effective, and a business enabler.

ExaGrid provides tiered backup storage with a unique disk-cache Landing Zone, long-term retention repository, and scale-out architecture. ExaGrid's Landing Zone provides for the fastest backups, restores, and instant VM recoveries. The retention repository offers the lowest cost for long-term retention. With SSP and ExaGrid, your scale-out architecture will include full appliances and ensure a fixed-length backup window as data grows, eliminating expensive forklift upgrades and product obsolescence.

SolarWinds is a leading provider of powerful IT infrastructure management software with a commitment to excellence in end-to-end hybrid IT performance management. SolarWinds provides you the power to monitor and manage the performance of your IT environments regardless of size or models. With simple, effective, and scalable IT infrastructure solutions and access to industry-leading support, SolarWinds ensures that you will always know what is going on in your environment.

Menlo Security protects organizations from cyberattacks by eliminating the threat of malware from the web, documents, and email using their built in Isolation Core™. With Menlo and SSP, you can digitally transform your enterprise to leverage the full benefits of the cloud without requiring endpoint software or impacting the end-user experience.

As a worldwide leader in next-generation cybersecurity, **Sophos'** cloud-native and AI-enhanced solutions secure endpoints and networks against evolving cybercriminal tactics and techniques. The award-winning Sophos Central cloud-based platform integrates Sophos' entire portfolio of best-of-breed products, from the Intercept X endpoint solution to the XG Firewall, into a single system called Synchronized Security. Sophos and SSP ensure that you will always be one step ahead of the most advanced threats.

BlackBerry Cylance is revolutionizing cybersecurity with artificial intelligence and machine learning to proactively prevent, rather than reactively detect the execution of advanced persistent threats and malware. Their flagship product, CylancePROTECT®, is the world's first next-generation antivirus built on artificial intelligence and machine learning. With Blackberry Cylance and SSP, that same groundbreaking technology is available for you.

BlackBerry AtHoc is trusted by organizations globally to unify their crisis communications, providing leaders with information they need to make critical safety decisions. AtHoc leverages the power of mobility, hybrid cloud and the IP network to deliver a unified and secure end-to-end solution capable of real-time collaboration and event management with anyone, anywhere and across virtually any device, bringing you a whole new level of protection for your people.

Symantec a leading cyber security company which provides strategic, integrated solutions to defend against sophisticated attacks across endpoints, cloud, and infrastructure. Symantec operates one of the world's largest civilian cyber intelligence networks, allowing it to see and protect against the most advanced threats.

As a leading-edge cybersecurity company, **McAfee** provides advanced security solutions to consumers, small and large businesses, enterprises, and governments. Security technologies from McAfee use a unique, predictive capability to provide advanced protection from online threats. With the belief that no one person, product, or organization can fight cybercrime alone, McAfee has teamed up with SSP to fight the challenges of the digital age and emphasize the importance of collaboration for the most effective solutions.

VIAAS is a leading expert on surveillance solution in both industry and school settings. They are a provider of cutting-edge Video Surveillance as a Service – a powerful, reliable, secure, and efficient complete cloud-based video surveillance solutions that monitors your environment. Seamless deployablity, zero configuration, high quality footage, and secure storage ensures that VIAAS is the most effective way to monitor and protect your environment from threats in real time.
